## Student verification (to be completed personally)

I must personally verify the submitted implementation, evidence, sources and claims before signing. No student verification is asserted by this unsigned draft.

## Disclosed assistance

OpenAI Codex assisted implementation, tests, debugging, developer evaluation, documentation and packaging. Qwen2.5-7B-Instruct Q4\_K\_M was used for the local answer experiment; BGE-small-en-v1.5 for retrieval. Historical 0.5B failures remain in the repository. No model training/fine-tuning or independent OEM acceptance claimed.

Synthetic evaluation labels and semantic assessments are agent-authored, not independent engineer review. Public KUKSA inputs retain licenses and provenance.
